DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed August 2, 2001 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office. It has been placed in the application file, but the information referred to therein has not been considered.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 20-38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,231,459. Although the conflicting claims are not identical, they are not patentably distinct from each other because the same subject matter is being claims except U.S. Patent No. 6,231,459 claims a plurality of balls having different colors rather than just one ball. Having a plurality of balls do not distinguish itself for having just one ball due to the fact that each of the plurality of balls have instructional and positioning indicia that also

Art Unit: 3711

teaches the user how to address the golf ball; therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have any number of golf balls having instructional and positioning indicia on the outer surface in order to teach an individual how to address a golf ball when playing golf.
